Consultnet Training Solutions

Consultnet Limited is a multi-disciplinary engineering consultancy established in 2002, offering high quality, innovative civil, structural, environmental and safety solutions to a variety of industrial and commercial clients.

Our Environmental & Safety division provides training and consultancy services in the chemical, pharmaceutical, biotechnology, local authority, construction, agricultural and extractive sectors. Our services include environmental assessment & monitoring, contaminated land remediation, safety and environmental management services, IPPC and waste licence applications & compliance reports, independent accident investigation, risk assessment, occupational hygiene, REACH reports and technical management training.

Our customised training programmes are designed to give your employees 'best practice' information on the chosen topic in a highly practical & participative format using a range of communication media. Cost effective, flexible in-house training programs can cater for up to 15 participants, on a date and at a venue to suit you.

Our tutors are chartered engineers and scientists with excellent course delivery skills, extensive knowledge and relevant industrial work experience. We also provide comprehensive course materials with support during and after the course.
